## **HOMETOWN HEALTH CENTER NEW FACILITY OPENING SPRING 2026**

### **HOMETOWN Health Center reaches community milestone with new facility**

**Palmyra, ME** – HOMETOWN Health Center (HHC) is preparing to open its new integrated medical, dental, behavioral health and wellness facility in Palmyra in spring 2026, marking a major milestone for the organization and the communities it serves.

The facility will feature a membership-based fitness center offering instructor-led group fitness classes, exercise equipment and an indoor walking track. The gymnasium will be suitable for activities such as pickleball and basketball, among others. Additionally, there will be a teaching kitchen for cooking classes and a food pantry with access to fresh and frozen produce. An on-site childcare center has also been designed to support HHC staff.

“Our new facility is a place where families can see a medical provider, get dental care, receive behavioral health support and join a fitness class—all under one roof,” said Robin Winslow, CEO of HOMETOWN Health Center.

HHC will expand its Medication Assisted Treatment program by introducing new care team members who are deeply committed to patient-centered, compassionate addiction care to address the opioid crisis in the community.

“For more than a decade, this facility existed only in our dreams and on blueprints,” Winslow added. “Today, as we stand on the threshold of completion, I’m overwhelmed with gratitude for everyone who believed in this vision and worked tirelessly to make it a reality.”
